

New Improved Hydrocarbon Absorbent Pads

Improvements

- Now incorporates our SpillSecure Technology to hold onto the absorbed liquids even better.
- Our new triple layer construction make our pads 60% stronger.
- Spun bond coverstock reduces lint by 98%.
- Heat weld dimpling for even faster absorption.
- Repels water and absorbs hydrocarbons only.
- Perforated for easier and more cost effective use.
- More compact when packed for improved transport costs.
- Packed in the easy to use dispenser box.
- Coloured white to match the international convention of absorbent colours.

New hydrocarbon absorbent pads with SpillSecure Technology

Application

These hydrocarbon absorbents are available in a range of forms including pads and rolls. They are ideal for use where a wide range of oils, fuels and all other hydrocarbons are used, stored or dispensed.

- Triple layer for superior strength
- Dimpled for even faster absorption
- Perforated for cost effective use

Packed in new handy dispenser box
