

Safety Shower Inspection, Test & Maintenance Service

Just because you bought a compliant safety shower and eye wash it is not the end of your responsibility. In order for your safety shower to remain compliant, a scheduled maintenance system must be in place.

AS4775 is the Australian Standard for Safety Shower and Eye Wash Equipment. In addition to the regular operational testing the must be undertaken the equipment must have an annual inspection to all aspects of compliant operation are maintained. The Standard states:

“All shower units shall be inspected annually to ensure conformance with the requirements of this Standard. A tag should be permanently attached to each shower unit, to be marked at the successful completion of each inspection.”

Poorly maintained emergency eyewash and shower equipment could lead to life changing injuries to an employee. Chemical and other splashes and spills can seriously maim and disfigure your workers. Emergency eyewash and shower equipment provide a speedy first line of defence to help reduce injury.

If you don't have your emergency eyewash and shower equipment properly maintained, it could give you and your workers a false sense of protection. It could also mean you have breached WHS regulations and penalties may be applied.

Spill Station now offer a complete safety shower and eyewash inspection and testing service to ensure you equipment complies with the standard.

This service includes quarterly 30 point equipment inspection and test checklist and an annual 38 point full service and compliance check in accordance with AS4775.

The equipment covered in the service includes:

- Safety Showers
- Eyewash Equipment
- Eye/Face Wash Equipment
- Drench Hose
- Eyewash Bottles
- Self-contained Eyewash Equipment

Spill Station's shower & eyewash testing service specialises in laboratories, prep rooms and other inside locations where test water need to be contained. Our team of trained technicians ensure that floors stay dry and test water is contained in the testing apparatus.

Don't find out it doesn't work when you need it most. Contact Spill Station today and find out how we can help you to meet your workplace safety obligations today.
