

Scheduled Spill Kit Service with Electronic Real Time Reporting

To ensure that your organisation is meeting obligations under clause 37 and 362 of the WHS regulations and staff are equipped to respond to hazardous spills, Spill Station Australia offers a complete 18 point Spill Kit Maintenance Program for your spill control equipment.

By handing over ownership of spill kit maintenance to Spill Station Australia you can allow your team the time to focus on the business of doing business.

What does this service include?

- Complete initial spill response capacity audit
- Spill kits are numbered and the location noted.
- An 18 point checklist is completed on each spill kit
- This checklist covers the accessibility, usability and suitability of each spill response asset.
- Photos are taken of the spill kit at the start and completion of each kit inspection and any defects or non-compliances are recorded.
- All used individual components are restocked at the bulk rates at the time of inspection
- Upon completion of the site inspection and restock, two reports are instantly compiled and sent.
- The first report is contains a list of the items replaced, line cost and total cost.
- The second report contains the completed checklist for each spill kit and an individualized list of components replaced.
- Emergency re-stocks available for dispatch within 24 hours.
- All inspected spill kits are fitted with a tamper evident audit tag
- Training tools supplied as required, ensuring that even new staff can effectively respond to hazardous spills.
